

WHY SPECIFY HP DPM

STANDARD DPM	HIGH PERFORMANCE DPM
Made from recycled polythene	Made from tough co-polymer thermoplastic
For domestic & light commercial builds	For high rise & commercial heavy duty RC slabs
For low foot traffic sites	Resistant to high foot traffic & heavy loads
Standard damp proofing protection	Ultimate damp proofing protection
Light duty damage resistance	Heavy duty damage resistance
Not suitable for hard wood floor constructions	Suitable for hard wood floor constructions
Multi folded membrane - value option with multiple folds	Centre folded membrane - less folds reduces the risk of leaks
Not recommended for gas protection applications as per BR 211	Protects against high levels of Radon & very low levels of other gases

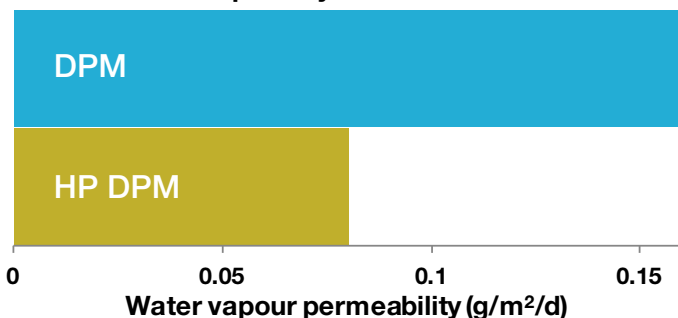

8X greater impact resistance

2X greater elongation strength

2X less water vapour permeability The primary function of a DPM
