

# CPD 2: STRUCTURAL WATERPROOFING

## An Essential Guide to Structural Waterproofing

Architects and specifiers are faced with evermore challenging environments, in particular the protection of buildings against water penetration and damp ingress. Visqueen's seminar discusses the current regulations surrounding the specification and installation of structural waterproofing solutions, highlighting common problems and associated failures.

### STRUCTURAL WATERPROOFING CPD IS:

- ✓ **BS8102: 2009 and NHBC Chapter 5.4 Buildmark Warranty compliant**
- ✓ **Delivered by Visqueen's PCA (Property Care Association) registered and CSSW (Certified Surveyor's in Structural Waterproofing) qualified instructors.**

### THE SEMINAR WILL COVER:

- ✓ Risk assessment
- ✓ Stakeholder requirements
- ✓ Project considerations
- ✓ Consequences of failure
- ✓ Design solutions
- ✓ Visqueen support
